Notes:

- (1) Information on configuration was provided by the equipment manufacturer as part of the testing process.
- (2) **Type of Operations:** On the basis of the Concept of Operations (CONOPS) of the tested security scanner, provided by the manufacturer, the security scanner performance was tested for a given type of operations:
- **Type A:** Security scanner with automatic threat detection and indication of the location of detected objects on a stick figure.
 - **Type B:** Security scanner with a human reviewer to analyse the image and to indicate the location of detected objects.

(CC) A configuration change has been endorsed by the CEP Management Group as not-affecting detection.

(CE) The entry has been modified by the Secretariat generally to amend typos and errors in the designation of configuration details, previous endorsement by the CEP-MG.

Any changes compared to the previous version (i.e. September 2024) are displayed in blue colour, including new grouping of configurations corresponding to the same test reference and date of communication.
