

REPORT ON UNMANNED AIRCRAFT SYSTEMS (UAS)

ECAC/39

Raúl Medina Caballero

**Focal Point for Unmanned Aircraft
Systems UAS)**

2019-2021 Work Programme

To support the development of RPAS in Europe

- To promote strategic debates on the RPAS future by Member States
- To support the sharing of experiences and national policies and practices on UAS among ECAC Member States

Key topics

Key topics addressed

Regulatory framework on UAS

U-Space implementation (EU regulation)

Urban Air Mobility

Environmental research on drone noise

Drone incidents and collisions between drones and manned aircraft

UAS aviation security aspects

High-level exchange of views on UAS

2019-2021 achievements

ECAC website

- A new public site has been created on ECAC website
- Restricted web platform for exchanging data and information on UAS
- Network of national contact points in charge of UAS matters

Survey on national policies and practices

- Launched in August 2019 among Member States and published April 2020
- Seven main topics on relevant aspects for development of UAS sector

Aviation Security

- Views exchanged on recent UAS-related incidents and protection of airports against UAS attacks
- Specific guidance material adopted by Security Management Group in 2020

Contacts with key partners

- Meetings held with Israel, China and other countries.
- Regular exchanges between ECAC Coordinating Committee and the US.

Exchange of information

- The first edition of a new UAS bulletin published in May 2021
- The ECAC NEWS#73 summer 2021 edition dedicated to UAS

2019-2021 achievements
